Join your colleagues today and become a Foundation Monthly Donor!

Have you ever wondered how your contributions to the Texas Academy of Family Physicians Foundation are used? Your tax-deductible gifts help promote and sustain the future of family medicine in three important areas:

- ✓ *Promoting and fostering medical students' interest in family medicine*
- ✓ *Encouraging and supporting residents in family medicine training programs*
- ✓ *Advancing practice-based clinical research in family medicine*

Promoting and fostering interest in family medicine among our bright young men and women in medical schools is essential to the future of our specialty. TAFP Foundation scholarships help ease the tremendous debt faced by today's medical students.

The TAFP Foundation does not forget the needs of family medicine residents. The Foundation has designated scholarships dedicated to encouraging and developing leadership skills for personal, professional and societal activities.

The family physician office is an immense and valuable laboratory for ambulatory medical research. What better place is there to advance practice-based research? Supporting networks and individual family doctors willing to participate in research studies will result in improved patient care and outcomes.

Be a TAFP Foundation Monthly Donor! Sign up today and give any amount of your choosing each month and help the TAFP Foundation to strengthen family medicine.
