TAFP FOUNDATION BOARD OF TRUSTEES

Saturday, November 7, 2026
9:15 – 11:45 a.m. CST
Montgomery C, The Woodlands Waterway Marriott Hotel

AGENDA

1. Call to order by Linda Siy, MD, President.
2. Roll call and introduction of guests/members.
3. Approval of Minutes of meeting on April 10, 2026
4. Current Business
    - A. Research – Lesca Hadley, MD
        - i. New proposals
        - ii. Final reports
    - B. Resident scholars – Zarif Gani, MD, and Bolanle Windapo, MD
    - C. Student and resident travel funding
    - D. Financial Report
        - i. Approval of FY27 budget – Lloyd Van Winkle, MD
        - iii. Investment report – Stephen Benold, MD, and Jordan Benold
    - E. Nominating Committee – Justin Bartos, MD
        - i. Election of Board members
        - ii. Election of officers
    - F. AAFP Foundation update – Justin Bartos, MD
    - G. Geriatrics endowment proposal
    - H. Activities at 2026 Annual Session & Primary Care Summit
5. Information Items
    - A. Cumulative Donors and Monthly Donors
    - B. Scholarships
6. Other Business
7. Adjourn

TAFP Foundation Board of Trustees

November 2026

Full Name	Position	City
Linda Marie Siy, MD, FAAFP	President	Fort Worth
Rebecca Eileen Hart, MD, FAAFP	Vice President	Fredericksburg
Lloyd Van Winkle, MD, FAAFP	Treasurer	Castroville
Justin V Bartos, MD, FAAFP	Trustee	Bedford
Adrian Billings, MD, PhD, FAAFP	Trustee	Alpine
Emily D Briggs, MD, MPH, FAAFP	Trustee	New Braunfels
Douglas W Curran, MD, FAAFP	Trustee	Athens
Bruce Alan Echols, MD, FAAFP	Trustee	Dallas
Tricia C Elliott, MD, FAAFP	Trustee	Fort Worth
Lewis Emory Foxhall, MD, FAAFP	Trustee	Houston
Roland Goertz, MD, FAAFP	Trustee	Waco
Lesca C Hadley, MD, FAAFP	Trustee	Cleburne
Terrance S Hines, MD, FAAFP	Trustee	Austin
Lahri Kancharla, MD	Trustee	Flower Mound
Shelley Kohlleppel, MD	Trustee	Lakehills
Kaparaboyna Ashok Kumar, MD, FAAFP	Trustee	San Antonio
Eric Ted Lee, MD, FAAFP	Trustee	Bellaire
Javier D Margo, MD, FAAFP	Trustee	Rio Grande City
Mary Suzanne Nguyen, MD, FAAFP	Trustee	Castroville
Donald R Nino, MD, FAAFP	Trustee	Houston
Tochukwu Austine Noh, MD	Trustee	Odessa
David Schneider, MD, FAAFP	Trustee	Dallas
Puja Anil Sehgal, MD	Trustee	Sugar Land
Joshua Nathaniel Splinter, MD, FAAFP	Trustee	Athens
Amna Waqar, MD, FAAFP	Trustee	Houston
Jessica Yao, MD, FAAFP	Trustee	San Antonio
Richard A Young, MD	Trustee	Fort Worth
Andrea Nguyen, MD, MHA	Resident Advisor	Houston
Makalyn Price	Student Advisor	Fort Worth
Lane J. Aiena, MD, FAAFP	Ex Officio	Montgomery
Sarah O Ashitey, MD, FAAFP	Ex Officio	Dallas
Lindsay K. Botsford, MD, FAAFP	Ex Officio	Houston
Kyle Lee Breed, Jr, DO	Ex Officio	San Antonio
Jessica Nu Glick, DO, FAAFP	Ex Officio	Bellaire
Amanda Elise Mohammed-Strait, MD, FAAFP	Ex Officio	Rowlett
Ikemefuna Charles Okwuwa, MD, MBA, FAAFP	Ex Officio	Odessa
Tina J. Philip, DO	Ex Officio	Round Rock
Rashmi Rode, MD, FAAFP	Ex Officio	Houston
Zachary Reece Sartor, MD, FAAFP	Ex Officio	Waco
Brittany Joy Uebbing, DO	Ex Officio	Waco

TAFP FOUNDATION BOARD OF TRUSTEES
Date: April 10, 2026

Members participating:
Justin Bartos, MD, FAAFP
Adrian Billings, MD, PhD, FAAFP
Emily D Briggs, MD, MPH, FAAFP
Bruce Echols, MD, FAAFP
Roland Goertz, MD, MBA, FAAFP
Lesca C Hadley, MD, FAAFP
Terrance S Hines, MD, FAAFP
Shelley Kohlleppel, MD
Eric Lee, MD, FAAFP
Donald Nino, MD, FAAFP
David Schneider, MD, FAAFP
Puja Sehgal, MD
Linda Marie Siy, MD, FAAFP
Joshua Splinter, MD, FAAFP
Amna Waqar, MD, FAAFP
Jessica Yao, MD, FAAFP
Richard Young, MD

Lane Aiena, MD, FAAFP, Ex Officio
Lindsay Botsford, MD, FAAFP, Ex Officio
Jessica Glick, DO, Ex Officio
Tina Philip, DO, Ex Officio
Rashmi Rode, MD, FAAFP, Ex Officio
Zachary Sartor, MD, FAAFP, Ex Officio

Others participating:
Kathy McCarthy- Staff
Robert Montoya – Staff
Stephen Benold, MD – Investment Advisor

CALL TO ORDER

The meeting was held at Kalahari Resorts and Conventions. It was called to order at 1:15 p.m.

ROUTINE BUSINESS

The minutes of the November 15, 2025, meeting were approved without modification.

Trustees and Ex Officio members were asked to review the conflict of interest policy and disclose any conflicts in advance of the meeting. Dr. Siy was provided a list of those conflicts before the meeting.

FAMILY MEDICINE RESIDENT SCHOLARS PROGRAM

Dr. Siy shared the names of the new scholars selected – Dr. Bolanle Windapo and Dr. Zarif Gani. The interview committee this year included Dr. Linda Siy, Dr. Jake Margo, Dr. Jacob Oliver, and Kathy McCarthy. Dr. Siy thanked the members who reviewed applications in the first round of the process. Those volunteers included Drs. Jessica Glick, Mary Nguyen, Richard Young, Lesca Hadley, Amna Waqar, Rebecca Hart, Lindsay Botsford, Lahri Kancharla, Ashok Kumar, and Joshua Splinter.

FINANCIAL UPDATE

Kathy McCarthy provided an overview of the TAFP Foundation finances. Six months into the fiscal year, we're on track to meet our budget.

Dr. Stephen Benold presented a report on the TAFP Foundation investments. The annual rate of return for the calendar year 2025 was 5.6%. He discussed the idea of moving a portion of the funds from US Treasury bills to corporate bonds.

TRAVEL FUNDING

Kathy McCarthy provided a brief update on travel funding. The new travel funding guidelines are in place and so far no concerns from students and residents.

RESEARCH

Dr. Richard Young provided an update on research funded by the TAFP Foundation. There were seven new proposals for this cycle. The committee decided to fund two and potentially one more if it is resubmitted with more of a research focus. Dr. Bruce Echols and Dr. Lesca Hadley are the other members of the research grants committee. The agenda packet included final reports from two researchers.

NOMINATING COMMITTEE

Each year a Nominating Committee is elected at Interim Session and presents nominations for officers and trustees at the Annual Session.

MOTION: Elect Justin Bartos, MD, Ashok Kumar, MD, Rebecca Hart, MD, Shelley Kohlleppel, MD, Roland Goertz, MD, and Lesca Hadley, MD, as the Nominating Committee for 2026.

ACTION: Motion adopted.

PHILANTHROPIST OF THE YEAR

In 2024, the decision was made to create a nomination process and not necessarily give the award every year to make it more meaningful. There were no nominations and thus no award was given in 2025. Dr. Siy made an appeal to members to nominate a colleague.

TAFP SCHOLARSHIPS

The Board reviewed an update on the Leon Rochen Scholarship. The fund needs $9,835 to be fully endowed. It honors the longtime executive director for the Harris County Academy of Family

Physicians who passed away in 2024. Dr. Donald Nino provided an update on the development of the fund. The chapter has been matching donations.

OTHER BUSINESS

Dr. Siy noted the cumulative and monthly donor reports included in the packet and discussed planned fundraising and other activities at the TAFP Annual Session and Primary Care Summit in November. The Foundation has a donated piece of art from Jim White. The Executive Committee will determine how best to auction that item. A fundraising dinner will be planned for Friday, November 6.

Meeting adjourned at 2:30 p.m. by Linda Siy, MD.
Minutes submitted by Executive Director, Kathy McCarthy.

MEMO

To: TAFP Foundation Board of Trustees

From: Kathy McCarthy, CAE on behalf of the Research Grants Committee

Date: October 30, 2026

Re: Research Update

Research is going strong. We had eight many more proposals for the fall cycle. Drs. Lesca Hadley, Bruce Echols, and Richard Young are still reviewing the proposals and making a decision on funding.

A final report from Dr. Ashley Collazo follows this memo. She is presenting this research as part of The Abstract during the TAFP Annual Session and Primary Care Summit on Friday afternoon. There is also a report from Dr. Abayomi Ogunwale and one from Chance Strenth, PhD. He shared this his research was recently published in *Psychoneuroendocrinology.*

Research in progress

Here are the research projects funded and in progress.

Funded in 2026

Experiences of Food Insecurity Among Patients Accessing Care through the County Safety-Net Health System
Juliana Dixon, MD, MPH, UT Southwestern

AI-Generated Life-Concordant Regimen Complexity Index (RCI): Making Chronic Disease Plans Fit Patients' Lives
Jacob Oliver, MD, MBA, UT Tyler Rural Family Medicine Residency Program

Are We Losing Muscle? Early Detection of Skeletal Muscle Quality Changes Following GLP-1 Receptor Agonist Initiation Using Point-of-Care Ultrasound in Primary Care
Nadir Mulla, MD, CAQSM, Houston Methodist Sugar Land FMRP

Funded in 2025

Feasibility of Integrating Acupuncture in Primary Care for Medically Underserved Populations
Hasan Yasin, MD, UTMB Galveston

Understanding Women's Experiences with IUDs: A Qualitative Study in Bexar County
Tharani Ravi, MD, UT Health San Antonio

Treatment of alcohol use disorders in adults in office-based addiction treatment clinics vs. psychiatric clinics in a county system: medication prescribing behaviors
Andrea Nguyen, MD, UT Health McGovern

Stroke Risk from Menopausal and Contraceptive Hormones in Women 45-64 years of age
Laura Porterfield, MD, MPH, FAAFP, UTMB Galveston

The Association Between Stigmatization Profiles and Chronic Pain in a Family Medicine Patient Population
Chance R. Strenth, PhD, UT Southwestern

Funded 2024

Implementing and assessing the impact of an OB skills workshop on the OB clinical rotation experience for Family Medicine residents
Deepa Somcio, MD, Memorial Family Medicine Residency

Exploring and Improving Type 2 Diabetes Outcomes Using Short-Term Continuous Glucose Monitoring
Chelsea Mendonca, MD, Baylor College of Medicine

Waco COVID survey Follow-up survey
Sally Weaver, PhD, MD, Waco Family Medicine

Building a Sustainable Referral System between Primary Care and the San Antonio Food Bank: Implementation and Evaluation
Yun Shi, MD, PhD, UT Health San Antonio

Understanding Clinicians' and Residents' Utilization of Telehealth in Family Medicine: An RRNeT Study
Maria Montanez Villacampa, MD, UT Health San Antonio

Funded 2023

Implementation of a Hypertension Education Class at a Community-based clinic in an underserved urban area
Jonnae Atkinson, MD, Baylor College of Medicine

New proposals

We received eight new proposals. The committee is still deciding which to fund.

COVER SHEET FOR CLOSING REPORT

Start date: 05/01/2025

Stop date: 04/30/2026

Principal Investigator: Dr. Ashley Collazo

Institution: Baylor College of Medicine

Title of Project: "Knowledge, treatment practices, and preventative strategies for Urinary Tract Infections (UTI) in Spanish-speaking women"

Urinary tract infections (UTIs) are the most common bacterial infections in primary care, with half of adult women having more than one UTI in their lifetime. The growth of drug-resistant uropathogens has resulted in increased rates of treatment failure and UTI recurrence. Those disproportionately susceptible to drug-resistant UTIs are of lower socioeconomic status, need the use of an interpreter, and were born outside of the US. In our previous survey on the prevalence of antibiotic use without a prescription (non-prescription use) in Texas, self-reported urinary tract infections were among the top reasons for this unsafe practice. Non-prescription antibiotic use includes obtaining and taking antibiotics without a prescription, taking another person's antibiotics, or taking one's own stored antibiotics for an indication other than that for which the antibiotic was originally prescribed. The relationship between non-prescription use and urinary tract infections has yet to be fully assessed. To address this gap, we developed a unique cross-sectional quantitative survey to explore patient knowledge of UTIs, preventive and treatment practices for UTIs, including non-prescription antibiotic use, and quality of life among Spanish-speaking women with UTI recurrence. This survey was translated into Spanish and refined with the help of a bilingual female community advisory board. We then surveyed Spanish-speaking women in the Houston community who have had a UTI in the last year.

We surveyed 150 out of 179 women (84%). Participants had a median age of 41.5 years (IQR 34-53). Most had adequate health literacy (82%), were uninsured (43.3%), and did not attend college (78%). Most women correctly reported at least one evidence-based symptom of UTI (99%). However, a substantial proportion of women incorrectly believed tight-fitting clothes (83%) increased the risk of UTIs. Commonly used preventive strategies for UTI included natural remedies (i.e. horsetail and chamomile teas; 34%), improving hygiene practices, (i.e. washing clothes more often, bathing more frequently, and avoiding use of public bathrooms; 14%), vaginal treatments (i.e. vaginal washes, vaginal suppositories; 14%), vitamins/supplements (13%), pharmaceuticals (i.e. over-the-counter pain medications; 9%), and cranberry products (6%). Only 22% of women reported seeking medical advice for UTI treatment, while 7% reported using non-prescribed antibiotics. Women with recurrent UTI (i.e., 3 or more UTIs in one year; 25%) were 2.5 times more likely to self-treat UTI symptoms with non-prescribed antibiotics (95% CI: 1.19-5.54; p 0.016). Women with recurrent UTI (composite score 56.1; IQR 36.7-71.7) also had overall poorer quality of life than women without recurrence (composite score 42.8; IQR 30.6-56, p 0.012) — reporting their UTI symptoms most interfered with work or home responsibilities, causing missed days and difficulty concentrating on or handling their workload.

In summary, we found substantial knowledge gaps about UTI symptoms and risk factors in Spanish-speaking women. There was also widespread use of unproven prevention and treatment strategies, several of which may increase UTI risk. Spanish-speaking women suffering from recurrent UTI are more likely to self-treat with non-prescribed antibiotics, increasing their risk of drug-resistant UTIs. Based on these findings, we will develop an educational tool for Spanish-speaking women designed to correct UTI misconceptions, promote evidence-based prevention strategies, and reduce non-prescribed antibiotic use for self-treatment of UTI.

EXECUTIVE SUMMARY

Project Title: Predictors of Telemedicine Preference Among Low-Income Patients in Community Health Centers

Project Overview

This project was completed as funded to evaluate factors influencing telemedicine preference among low-income patients receiving care in safety-net community health centers. The study supports TAFP's goals sponsoring research which advancing equitable, patient-centered health delivery.

Objectives

The primary objective was to identify demographic, technological, and experiential factors that predict patient preference for telemedicine versus in-person visits. A secondary objective was to assess how perceived quality of provider communication influences telemedicine acceptance.

Methods

A cross-sectional survey was conducted between November 2023 and October 2024 at two Harris Health community clinics (Aldine and Acres Home) in Houston, Texas. Adult patients completed a 38-item questionnaire available in English, Spanish, and Vietnamese assessing telemedicine experience, perceived effectiveness, visit quality, and barriers. Statistical analyses included non-parametric testing, correlation analysis, and multivariable regression adjusting for age, gender, language, education, race/ethnicity, and residence. All ethical approvals and project milestones were completed as planned.

Study Population

A total of 336 patients participated; 77% had completed a telemedicine visit. Participants were predominantly Hispanic (79%), female (77%), Spanish-speaking (65%), and urban-dwelling (60%), with a mean age of 50 years, reflecting the target underserved population.

Key Findings

Telemedicine preference varied significantly by gender, language, age, education, and residential context. Female patients were more likely to view telemedicine as effective and of good quality, while male patients reported greater concerns regarding confidentiality and trust. Spanish-speaking patients experienced more difficulty initiating telemedicine visits and showed greater preference for in-person care, driven largely by technology-related barriers. Older age and lower education were associated with less favorable telemedicine attitudes.

A novel and important finding was that **perceived provider listening** strongly predicted telemedicine acceptance among female patients, independent of sociodemographic factors. Ease of technology use was a key determinant of telemedicine effectiveness perceptions among Spanish speakers.

Implications and Value

The findings highlight modifiable drivers of telemedicine preference, emphasizing that patient experience—particularly communication quality and technology usability—plays a central role in telehealth acceptance. Results support targeted investments in language-appropriate technical assistance, provider communication training, and hybrid care models to improve equitable telemedicine adoption.

Deliverables and Completion Status

All funded objectives were met. Deliverables include a completed dataset, analytic results, and a manuscript prepared for peer-reviewed publication. The project provides actionable evidence to inform telehealth policy, implementation, and quality improvement efforts in safety-net health systems.

UT Southwestern Medical Center

FINAL REPORT

Investigating Hormonal Influences on Pain and Stress Behavior using Longitudinal Adolescent Stress and Health Data

Grant: Texas Academy of Family Physicians (TAFP) Foundation

Principal Investigator: Chance R. Strenth, PhD

Abstract

Purpose: In the aftermath of the Opioid Epidemic, a better understanding of pain and new means of addressing pain have been sought out to reduce the reliance on and the abuse of opioids. Pain management is often managed by family medicine physicians who would benefit from new methods and a better understanding of pain. An under researched area when concerning pain is endocrine or hormonal factors that may contribute to either the mitigation of pain or its exacerbation. A better understanding of fluctuations in hormones and how they interact to produce pain could provide more insight into pain management and treatment. Using the Texas Longitudinal Study of Adolescent Stress Resilience and Health (TLSASRH) dataset, hormonal mechanisms were explored in their relation to pain. **Methods**: A longitudinal data analysis using daily diary data for 10 days was assessed in high school students starting the 9th grade. The hormones cortisol, testosterone, estradiol, progesterone, and dehydroepiandrosterone sulfate (DHEA-S) were examined in relationship with three pain outcomes: headache, stomachache, and backache. **Results**: Results were stratified by sex, pubertal status, and menstruation status. In the main analyses, no significant associations were found between headache, stomachache, and backache. In an analysis stratified by sex, testosterone was found to be negatively associated with backache (β = -.290, p = .049), however, no other significant associations were found with males and females. For both males and females that were in late to post puberty, cortisol (β = .201, p = .017) was positively associated with backaches while testosterone (β = -.240, p = .002) was negatively associated with it. For males and females in early to mid-puberty, progesterone (β = -.274, p = .007) was negatively associated with stomachaches. For those in late to post puberty, testosterone (β = -.212, p < .001) was negatively associated with stomachaches. Testosterone (β =-.183, p = .003) was also negatively associated with backaches for those in late to post puberty. No significant findings were found depending on menstruation status. **Conclusions**: The findings from this study highlight that testosterone mitigates pain but depends on the sex of the individual and the pubertal status. These results highlight how life course changes in the body and specific

hormones play a role in common pain complaints. Understanding how these fluctuations in later life impact pain may allow us to better treat and diagnose chronic pain.

Presentations at Professional Conferences

Strenth, C. R., Jetpuri, Z., & Thakur, B. (November 2025). The Role of Stress and Sex Hormones in Adolescent Pain: A Longitudinal Analysis. An Oral Presentation at the 53rd Annual *North American Primary Care Research Group (NAPCRG)* Conference held in Atlanta, Georgia, United States.

Strenth, C. R., Jetpuri, Z., & Thakur, B. (June 2025). Predicting Pain in Adolescents using Stress and Sex Hormones. An Oral Presentation at the 36th Annual *Human Behavior and Evolution Society (HBES).* Conference held in Atlantic City, New Jersey, United States.

Thakur B, Jetpuri Z, **Strenth** C. Modeling the longitudinal relationship between stress and sex hormones and self-reported pain using latent growth curve analysis in adolescents. Poster presented at: *Joint Statistical Meetings*; August 2-7, 2025; Nashville, TN.

Re: Update on Resident Scholars program

The program has been in place since 2020 and is doing great. Our two most recent scholars are planning to join us in The Woodlands to discuss their projects.

Here is a reminder of what the program provides:

- $2,500 stipend during first year of residency
- Travel support to attend TAFP's Annual Session and Primary Care Summit and C. Frank Webber Lectureship and Interim Session during their second year of residency.
- $2,500 stipend at the end of their second year of residency.
- Travel support to attend AAFP's Congress of Delegates and National Conference of Constituency Leaders in their third year of residency.
- $5,000 stipend at the end of their third year of residency.

Here is a recap on our scholars:

2020 Kendra Williams, MD – completed residency in 2022, practicing in Knox City, TX. Represented Texas at NCCL in 2025.

2021 Tyler King, DO – completed residency in 2023. Practicing in Laredo and serving on the Laredo City Council.

2022 Carmella DeSerto, MD – completed residency in 2024. Practicing in San Antonio with UT Health. Represented Texas at NCCL in 2025 and 2026. Elected Co-Convener and to Member Constituency Delegation
Gerardo Rodriguez, MD – completed residency in 2024. Working at Health Services of North Texas in Denton.

2023 Madeline Huff, MD – completed residency in 2025. Is working for WellMed in Austin.
Dorcas Omari, MD – completed residency in 2025. Working at Kindwell Primary Care in Conroe

2024 Kristie Tu, MD – Completed residency in 2026. Working at First Primary Care in Houston.
Melanie Diaz, DO – Completed residency in 2026. She is staying in the Waco area practicing emergency medicine at a rural critical access hospital in Gatesville.

2025 Corynne McEachern, DO – Third year resident at UT Health in San Antonio
Ryan Craig, DO – Third year resident at Methodist Charlton in Dallas

Here are Drs. Craig, McEachern, and DeSerto at the AAFP Congress of Delegates in Nashville:

2026 Zar Gani, MD – Second year resident at UT Dell in Austin
Bolanle Windapo, MD – Second year resident at DHR in McAllen

From: Kathy McCarthy, CAE and Juleah Williams

Date: October 27, 2026

Re: TAFP Foundation Travel Funding for Residents and Students

---

We recommend that the TAFP Foundation transition from receipt-based travel reimbursement to fixed travel stipends for students and residents attending the 2027 TAFP Student and Resident Summit. Stipend amounts would continue to be determined by geographic distance from the meeting location. This change would significantly reduce the administrative workload associated with processing reimbursements while maintaining meaningful financial support for attendees.

In 2026, the Foundation reimbursed more than $54,000 in travel expenses for 49 residents and 94 students attending the Summit. Processing these 143 reimbursements required substantial staff time to explain reimbursement requirements, collect and review receipts, process payments, and resolve individual questions. Because the Summit takes place just before the end of TAFP's fiscal year, this work also coincides with an especially demanding period for staff. At the current volume of recipients, the reimbursement process is no longer sustainable.

One consideration in moving from reimbursements to fixed stipends is the potential tax treatment of these payments. Recent federal legislation increased certain information-reporting thresholds beginning in 2026. We will confirm with our auditors but we believe the OBBBA raised the threshold to require the distribution of 1099s to $2,000 so even if a student attended FUTURE and the Summit, their payments would not rise to a level that would require the TAFP Foundation to issue 1099s.

Zones
We analyzed actual 2026 Summit reimbursements by geographic zone to establish reasonable fixed stipend amounts for 2027. The proposed amounts generally reflect historical travel costs while recognizing that attendees in some zones routinely incur expenses exceeding the current reimbursement limits.

	Max funding 2026	Avg Summit payment in 2026	# Students and Residents	2027 Summit recommendation	Notes
Zone 1 Less than 75 miles	$100	$84.20	25	$90	Mostly registration & mileage
Zone 2 76 – 200 miles	$300	$257	18	$275	
Zone 3 201 – 350 miles	$500	$432	74	$500	43 of 74 reimbursed full $500; 38 had receipts higher
Zone 4 351 to 500 miles	$600	$535	12	$600	7 of 12 reimbursed full $600, all with receipts totaling more than $600.
Zone 5 More than 500 miles	$750	$673	14	$725	5 of 14 reimbursed full $750; all with receipts totaling more than $750

Travel funding update

This was our third year under the funding structure. Funding is allowed for leaders, scholarship recipients, and poster competition participants for Annual Session, just leaders for Interim Session, just students and resident delegates for FUTURE (formerly National Conference), with the largest amount of funding reserved for the TAFP Student and Resident Summit.

For FUTURE, the funding has been a stipend of $600 the past few years. The students apply and are notified of their award with the stipulation that they register for the conference by a certain date and meet up with TAFP staff in Kansas City to get their check. That is working very well. We had lower demand for travel stipends this year.

Recommended Board Action

Item 1. Approve transitioning to fixed, distance-based travel stipends for the 2027 TAFP Student and Resident Summit, using the proposed zone amounts outlined above.

Item 2. For Summit, continue supporting at least one resident per program and three students per medical school and allocate additional funding slots based on the budget, actual income, and utilization for other conferences.

Item 3. Continue providing support as a reimbursement for Interim and Annual Session as the length of stay and other factors make a stipend less appropriate.

Item 4. Continue providing support to FUTURE as a stipend of $600 but continue to monitor utilization.

Below you can see our totals expenditures and numbers of supported students and residents for FY25 and FY26. We approved every student and resident who applied for Summit and FUTURE travel funding in FY26.

TAFP Foundation Travel Funding				
Residents	**FY 25 Actual**	**FY 26 Actual**	**Actual funded FY25**	**Actual funded FY26**
Annual session - leaders	$4,585	$3,581	9	7
Annual session – research posters (estimate)	$2,156	$2,098	6	6
Interim session - leaders only	$1,168	$1,082	2	4
Student and Resident Summit	$20,698	$21,177	47	49

Memorandum

To: TAFP Foundation Board of Trustees

From: Nominating Committee
Justin Bartos, MD; Ashok Kumar, MD; Roland Goertz, MD; Rebecca Hart, MD; Lesca Hadley, MD; Shelley Kohlleppel, MD

Date: October 23, 2026

Here are our recommendations:

Item 1. We recommend re-electing the following trustees to another three-year term on the TAFP Foundation Board of Trustees:

Douglas Curran, MD; Lewis Foxhall, MD; Terrance Hines, MD; Shelley Kohlleppel, MD, Mary Nguyen, MD

Item 2. We recommend electing the following for a three-year term as At Large Trustees.

Lindsay Botsford, MD, MBA *Houston*	Has served as Ex Officio as part of the TAFP Board
Rashmi Rode, MD *Houston*	Has served as Ex Officio as part of the TAFP Board
Samuel Mathis, MD *Galveston*	Previously served. Resigned when serving on AAFP Board
Christina Kelly, MD *San Antonio*	Previously served as Ex Officio while serving on the TAFP Board before moving to another state

Item 3. We recommend the following slate of officers for 2027: President – Linda Siy, MD
Vice President – Rebecca Hart, MD
Treasurer – Lloyd Van Winkle, MD

Encouraging the growth of family medicine in Texas through the support of Texas medical students, residents and research.

MEMO

To: TAFP Foundation Board of Trustees

From: Kathy McCarthy, CAE, Executive Director

Date: October 30, 2026

Re: Geriatrics endowment

Last year, longtime Trustee Dr. Dale Moquist rotated off the Board of Trustees but sent a final letter encouraging the TAFP Foundation to create an endowment to provide CME on geriatrics like the Tamra Deuser, MD, Endowment we have for end-of-life care education. The Board consensus was to create an exploratory work group to develop the idea and bring it back to the full Board. Dr. Hadley was the only volunteer for the work group, and we haven't moved forward so I wanted to put this back on the agenda to check in. As I see it, there are three questions to start:

1. Is there agreement that this education is needed?
2. Should the TAFP Foundation help fund it with an endowment?
3. Should the endowment be named for someone?
4. Should we begin a fundraising campaign or designate a portion of the TAFP Foundation existing funds to create the endowment?

October 31, 2025

Linda Siy, MD

President TAFP Foundation

12012 Technology Boulevard

Suite 200

Austin, TX 78727

Cc: Kathy McCarthy

Dear Dr. Siy

I am writing this letter because I doubt if I will be at the next board meeting for the TAFP Foundation.

I received an email from Kathy McCarthy regarding being renominated to the Foundation Board. It would have been easy to fill out the form and say yes. I then started to think why should I continue to serve on the Board. I am no longer in practice and not completing CME at age 78. This is an opportunity for a younger physician to be involved. This is good for leadership development.

I want to thank the Foundation for letting me be involved. I am a farm boy from North Dakota. I can remember in 1998 when we had to move because of Carol's asthma, I called Jim Martin and Tim Lambert that I was moving to Texas. I informed them I just wanted to serve the TAFP. Sam Nixon, who installed me as the President of the NDAFP, was speechless when I told him about our upcoming move to Texas.

I was fortunate this Board gave me the privilege to be President for 10 years from 2006 thru 2016. With your help and the staff's help our endowment grew from $1,129,572 to $2,861,145. We established the Research Endowment

which is at $182,168. Our annual research grant funding grew from $20,000 to $35,000. Look at what we are doing now in research! We started the Tamra Deuser Endowment for supporting palliative care education.

As many of you know I have done numerous presentations at TAFP meetings on various Geriatric topics. My challenge to the TAFP Foundation Board is to establish an endowment to help support Geriatric education presentations at TAFP meetings. Our population is growing older, and FPs take care of older people in the hospital, clinics, nursing homes, and home visits. This is why I feel it is an important endeavor for the Board to support our members.

Thank you for considering this proposal and supporting my involvement in the TAFP.

Sincerely,

Dale C. Moquist, MD

From: Kathy McCarthy, Executive Director

Date: October 30, 2026

Re: Annual Session Activities

We have several opportunities for fundraising and visibility for the work of the Foundation at the 2026 Annual Session and Primary Care Summit.

- We will be auctioning a bronze sculpture, "Frontier Doctor" by Texoma artist Jack Stevens with a silent auction. The sculpture was a gift from TAFP to former Executive Director, Jim White, upon his retirement. Jim donated the sculpture to the TAFP Foundation. The estimated value is $3,000. The sculpture and bidding sheet will be near the TAFP registration desk and bidding will end Saturday afternoon. You must be present to win. Bidding starts at $500.

- We have a fundraising dinner at Kirby's Steakhouse on Friday. We have more than $13,000 in sponsorship and we still have a few tickets to sell.
- TAFP included a place for Annual Session registrants to make donations when they registered. We've raised $2,975 from that so far plus $600 from VIP seating.

- A research grant recipient, Dr. Chelsea Mendonca, is presenting Sunday morning on using Continuous Glucose Monitoring to drive lifestyle change.
- We'll recognize our Philanthropist of the Year, Dr. Donald Niño, cumulative donors, and scholarship recipients during TAFP's Awards Lunch on Saturday. We have 8 scholarship recipients planning to attend. They won't go on stage during the lunch this year. Instead, Dr. Siy will bring the scholarship recipients on stage in the general session right after lunch to put a face to the work of the TAFP Foundation. This is in lieu of the traditional Foundation update.
